

Temporary changes to the process of documentation and online submission of applications

The General Inspectorate for Migration (GIM) informs that, during the period from October 29 to November 3, 2026, the process of issuing identity documents at the Single Counters for Foreigners' Documentation will be temporarily suspended. Activities will resume starting November 4, 2026.

Other services provided by the GIM will continue to operate as usual. Additionally, the GIM informs that, starting with October 17, 2026, the e-migrare.gov.md platform will no longer be available. In this context, all applications for the granting or extension of temporary residence permits for work and investment purposes, submitted online, will be received through the platform until October 16, 2026.

The General Inspectorate for Migration will inform the public about the new platform through which the online application submission service will be available.

These changes are part of the GIM's transition to a new information system, adapted to modern technologies in the field of migration and asylum.

The implementation of the new system aims to digitize and streamline processes, as well as to improve the quality of services provided to foreign nationals, individuals and legal entities.

The GIM recommends that applicants take the above-mentioned deadlines into consideration and make the necessary arrangements for submitting their applications and requests in advance.
